

Formed as a single piece of injected polypropylene copolymer, the LINK LOTUS JUNIOR seat provides a the ultimate cost effective durable comfortable high density seat particularly for short duration events, low riser stands or where a back rest is not required. Available in the full range of RAL colours and with fixing options for riser, tread and direct to stand.

Ideal as an upgrade to arrangements where spectators sit directly on existing terracing or bench type "bleachers" or informal settings and short duration events.

Dimensions

We reserve the right to change the specifications of the products described in this leaflet at any time.
